IPMA, as partner of the FishEUTrust project, was represented by two team members (Laura Ribeiro and Carlos Cardoso) in the XXVth Seminar in Aquaculture of APA (organized by the Portuguese Association of Aquaculture) on the 10th May 2024 in Peniche (Portugal).

This is a key meeting of seafood farmers (producers of fish & other aquatic organisms) in Portugal that occurs every year and constitutes a major venue to meet sector stakeholders & divulge new ideas, initiatives, & projects.

Therefore, IPMA., used the opportunity of being present to make a key oral communication to the larger audience of all seminar participants & to distribute a questionnaire specifically addressed to seafood producers (in Portuguese language).
